

# THE CITY OF SIBLEY

---

The City of Sibley sits in the northwest section of Osceola County just west of Highway 60. The City was looking for an affordable solution to renovate the former Flindt & Miller building an abandoned commercial building they owned when they applied to the Derelict Building Grant Program in the fall of 2011. The City assumed ownership of the building in 2006 through a nuisance abatement procedure. The City created an urban revitalization program to rehab abandoned buildings. The City asked the Program for \$6,000.00 of assistance with renovation of the interior and exterior of the 1800ft<sup>2</sup> building so that they can market the building for commercial interests.

The project started in July and was completed in late November. The building was renovated by replacing the storefront and renovating the interior walls and ceiling per applicable building codes.
